## ***About Clayville Brick***

**Clayville Brick was initially formed in 2015 with the name of “Buildingman Supplier” hardware store in Clayville. The factory operating as brick manufacturing products was later acquired in the Gauteng market.**

**In 2019, Buldingman Supplier & Clayville Brick was merge and joined force, reuniting the two operations.**

**This restructuring has led us to a stronger, more efficient and effective operation, without compromising on the high standards of quality and service that have been established over the years.**

**Clayville Brick is a principle-based cement brick & products manufacturer operating in a mining environment and selling our products (cement stock / Maxi / Blocks & Pavers) to the construction industry.**

**Clayville Brick manufactures approximately 10 million bricks per annum using the traditional process of mining, extrusion, air drying, making the process susceptible to weather conditions and variations in the quality of the material being mined.**

**The bricks are sold to clients in the construction industry being major, medium, small contractors, building material merchants and private individuals.**

**Clayville Brick, we are proudly a BEE accredited company and a full Member of the Clay Brick Association of South Africa.**
